

APPENDIX Q

MACHINERY AND MECHANIZED EQUIPMENT

Machinery and mechanized equipment used shall comply with the following:

When a rubber-tired front-end loader, or a rubber-tired bulldozer is operated on floating plant, adequate safeguards will be installed to prevent it from moving into the water. Such a safeguard will be a bumper or curb with a minimum height of one-third of the outside diameter of the largest tire on the equipment or a barge tied alongside. Other safeguards may be used if approved in writing.
